

UNLEASH THE MOBILITY

I-94 West is a critical corridor that feeds northern and western Minnesota. The ability of this artery to handle capacity efficiently and safely is key to our state's vitality.

Enhance
Economic Development

Strengthen
Freight Mobility

Increase
Safety

Improve
Quality Of Life

The I-94 West Corridor comprises businesses, individuals, and government agencies committed to improving I-94 and its support facilities. Short- and long-term improvements to I-94 will generate economic benefits, improve freight and passenger car mobility, and enhance the quality of life for residents and visitors.

The mission of the Coalition is to provide a strong, united voice to advocate for and address transportation concerns along the I-94 corridor, from Maple Grove to St. Cloud. Our growing communities require foresight, planning, and relentless advocacy to ensure that Central Minnesota's transportation needs are not forgotten.

Our efforts are producing results. Phase 1, Rogers to St. Michael, has resulted in a 55% reduction in travel delay time!

Economic Development

Completing the capacity expansion of the proposed project is crucial for attracting needed economic development along the corridor, resulting in economic growth and local tax benefits.

Rogers - St. Michaels completed capacity expansion has produced proven economic development results:

- Quality of life: a 55% reduction in total travel time, reduced by approximately 350 hours per day
- Economic growth: Close to 3 million square feet of new industrial development
- Return on Investment: Average of \$2.10 in property taxes for every additional square foot, approximately \$6.2 million annually

UNLEASH THE MOBILITY •

Safety

Crash and severity rates on this corridor between Maple Grove and Albertville are higher than the statewide average for a highway.

- The segment between Rogers and Albertville alone are nearly twice the statewide average.
- This segment averages 1.4 accidents per day, 58 of those being critical incidents
- Monday morning between the times of 6:00 am and 8:00 am being the most likely time for an accident to occur, a huge safety concern and inconvenience for the thousands of commuters who utilize this corridor on a daily basis.
 - Sunday afternoon from 4:00 pm - 6:00 pm being the second most likely time for a crash to occur along this corridor, a very concerning statistic for the individuals and families traveling this corridor while returning from Northern Minnesota's booming tourism industry.

Quality of Life

- Our efforts are showing results with the completion of lane expansion from Rogers to St. Michael which resulted in a 55% reduction in total travel time!
- Quality of life is a high priority to Minnesotans. Strategic improvements are necessary to ensure that the enhancements to key regional connections are made possible for those living near or traveling through the I-94 West corridor.

Our efforts are producing results. Phase 1, Rogers to St. Michael, has resulted in a **55% reduction** in total vehicle delay!

- Studies have found that a daily commutes travel time has a serious impact on an individual's overall wellness. Longer commute times are proven to be a negative contributing factor to the physical and mental health of a commuter.*

Completing the phases of this project are crucial for enhanced economic development, increased freight mobility, increased safety, and an improved quality of life.

I-94 West is a crucial Minnesota transportation corridor, as well as a national freight arterial, which:

- Links the Midwest to the Pacific Northwest ports
- Is a key route for freight and travel to Chicago and the Eastern Sea Board
- Is the gateway to Northern Minnesota's Tourism Industry
 - Sunday afternoon from 4:00 - 6:00 pm being the second most likely time for a crash to occur along this corridor due to this.
